

CORPORATE PROFILE

As a manufacturer of engineered electrical solutions, we focus on delivering exceptional quality to our customers, through both our products and services.

Engineered Solutions

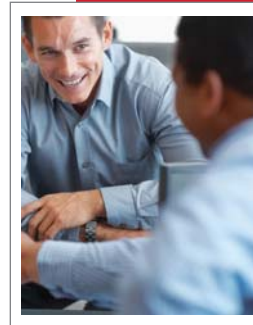

XACT is recognized across North America as a manufacturer of top-quality standard and custom electrical solutions. Our team works closely with our customers to understand their needs and challenges and ultimately to create complete solutions that address customers' specific project requirements for cables, enclosures, measurement-while-drilling (MWD) and over-molding.

Industry Sectors

XACT Engineered Manufacturing Solutions are found in some of the most challenging environments and some of the most intricate installations across North America. We have a track record of successful collaborations with companies from diverse industries, working closely with them to address their specific challenges, meeting both project and business requirements.

Exceptional Quality

Our reputation has been built on the quality of our products, quality that exceeds customer expectations, quality that is second to none in the industry. We achieve superior customer satisfaction rating by engaging and empowering the entire supply chain continuum in providing top-quality products and services, delivering them when and where they are needed.

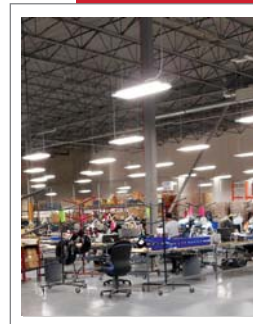

OUR FOCUS

In order for our company to be successful, our customers need to be successful. Strong, collaborative relationships are critical to achieving success and are recognized as a foundational building block of our progress. Through the engineering, design, manufacturing, installation and on-going support phases, the XACT team works closely with customers, ensuring that requirements are met.

OUR PROCESSES

We take customer satisfaction seriously at XACT and as such, we believe that success starts and ends with listening to our customers. Our processes have been developed with our customers in mind and are implemented to meet expectations; leveraging best practices in advanced supply chain management, lean manufacturing and continuous improvement.

OUR FACILITIES

The XACT company headquarters is home to both business operations and our world-class manufacturing facility, enabling our team to provide seamless, integrated support to our customers. The 50,000 square foot, secured facility was designed to ensure optimal performance in terms of space utilization, workflow and safety; and reflects our care and consideration of the environment.

The Energy Sector

XACT is recognized around the world as a manufacturer of top-quality standard and custom electrical solutions; supporting a vast array of industrial applications in the energy sector. From Oil and Gas exploration, production, refining and pipelines to renewable energy / power generation and distribution, XACT-built products have demonstrated superior performance in the field; around the globe.

Industry Insights

Our extensive knowledge and experience in the sector have enabled us to build highly-ruggedized products with a proven track record of excellent quality and reliability, even in the harshest environments. Additionally, our engineered solutions have played an integral role in some of the most intricate installations facilitating the speed and precision demanded by field operations.

Custom Solutions

We don't just manufacture products. Our team works closely with our customers to understand their needs and challenges and ultimately to create complete solutions. XACT engineered solutions not only meet the requirements of operating in harsh environments and remote locations, but address customers' specific project requirements in support of their overall business objectives. Our turnkey solutions include: Engineered Cables, Electrical Enclosures, Over-molding, MWD – Measurement While Drilling; with added support through Design Services, Technical Support and Advanced Supply Chain Management initiatives.

Measurement-While-Drilling (MWD)

XACT MWD solutions withstand the harshest conditions of Canadian winters in addition to the rigorous demands of resource exploration; consistently delivering data with precision and accuracy. They have proven successful in withstanding extremely high vibration and abrasion in the field, as well as in withstanding temperatures in excess of +200° and -50° Celsius.

Superior QUALITY:

Our product performance is second to none; 100% of our products undergo multi-stage quality testing.

Exceptional VALUE:

Our pricing is competitive; lean manufacturing practices and preferred vendor pricing allow us to pass savings on to our customers.

Rapid TURNAROUND:

Our agile processes allow us to deliver XACT products when our customers need them; expediting orders when necessary.

Online ACCESS:

The XACT Customer Portal allows customers to access drawings anytime, anywhere. If you do not have a Login ID, register with us at xact.ca

Maximizing ROI - TOGETHER

We not only understand the environmental conditions impacting our customers, we also understand the economic climate within which they operate. While capital budgets may be cut, turnaround budgets can be leveraged in procuring like-new product for use in the field – at a fraction of the cost. Our Repair and Refurbish service revitalizes products returning from the field; inspecting, repairing and offering a limited warranty.

Achieving success - TOGETHER

We take customer satisfaction seriously at XACT and believe that success starts and ends with listening to our customers. Our team works closely with our customers to understand their needs and challenges and ultimately to create product and service solutions that achieve business goals. Our programs and processes are developed with our customers in mind, they are implemented with our customers' input and evolve with their feedback.

Tackling business challenges - TOGETHER

As a supplier of engineered electrical solutions to industry, we understand the impact we have on the operational efficiency and outcomes of our customers. We don't just manufacture products, we work with customers to develop solutions that optimize performance and maximize the longevity of our customers' investments, both in capital and operating expenses.

We inspect, repair and modify a range of products:

- Cables, including those made from Polyurethane, Bostrig, and exane
- Junction boxes and control panels
- An inspection fee will be applied to products received.
- Repaired products carry a limited warranty covering the work undertaken by XACT.

Note: If we cannot repair the product to a satisfactory condition, you may choose to have it returned or recycled.

Contact Us - Working TOGETHER

Supporting customers is a priority for our team. We'd like to follow up with you to answer any questions you may have about our Repair and Refurbish program, intended to help you address your industrial electrical needs and operational challenges.

ENGINEERED SOLUTIONS

Engineered Manufacturing Solutions

Cable Assemblies

Our engineered cable solutions are developed to withstand the harshest environments and facilitate the most intricate processes; meeting specific requirements pertaining to temperature, abrasion, flexibility, moisture, strain relief and chemical resistance as well as for speed, and precision. XACT works closely with customers to develop solutions for specific electrical installations. Our engineered solutions, incorporating the highest quality materials, have consistently proven to perform beyond expectation.

Electrical Enclosures

Electrical enclosures are as important as what goes in them. Protect your investment in electrical equipment from any disturbance - from moisture, wind, dust and unanticipated activity. We can provide you with a solution to meet all of your indoor and outdoor needs. XACT fabricates electrical enclosures to customer specifications, offering control boxes, panel assemblies, and junction boxes in a variety of formats, sizes and materials.

Measurement While Drilling (MWD)

MWD is considered a breakthrough in well logging; integrating measurement tools into the drill string, and providing real-time information and steering assistance. Evolving from applications that transmitted data from the drill bit to the surface for decoding, MWD capabilities now include video transmission across vast distances - from well to head office. XACT MWD solutions are in service around the world and consistently deliver data with precision and accuracy.

Superior QUALITY:

Our product performance is second to none; 100% of our products undergo multi-stage quality testing.

Exceptional VALUE:

Our pricing is competitive; lean manufacturing practices and preferred vendor pricing allow us to pass savings on to our customers.

Rapid TURNAROUND:

Our agile processes allow us to deliver XACT products when our customers need them; expediting orders when necessary.

Online ACCESS:

The XACT Customer Portal allows customers to access drawings anytime, anywhere. If you do not have a Login ID, register with us at xact.ca

As a manufacturer of engineered electrical solutions, we focus on delivering exceptional quality to our customers, through both our products and services.

Over-molding

Over-molding of cables and connectors ensures optimum product performance and longevity. XACT customers from numerous industries with diverse applications have benefitted from our over-molding solutions. That experience has allowed us to develop a foundation of expertise in design, materials selection and injection molding processes, providing superior solutions to complex electrical interconnection challenges.

Over-molding and molded strain relief optimize product longevity

Additional Considerations

Our extensive product catalogue includes a number of accessories designed to expand the usage of our engineered solutions - such as gaskets. Additionally, we offer a number of products that make site management easier, - such as reels. Like many XACT customers, you may choose to personalize your custom cable assemblies by imprinting your company logo.

XACT can brand your product with a printed company logo

Design Services

Design consultation is available to optimize efficiency and apply cost effective approaches to solution development and implementation. Collaborative product design results in top quality products and successful installations. Dedicated Project Managers guide customers and select XACT team members to ensure projects progress in a timely and cost-effective manner.

Reels can be ordered with or without assemblies pre-installed

Technical Support

We consistently solve complex electrical interconnection problems. Technical support experts play a vital role in creating our engineered solutions, from the pre-production design stage, through production and installation; contributing to the success of every project. We constantly seek to challenge our effective business processes, demonstrating our commitment to continuous improvement.

High quality gaskets can be colour coded for ease of use

INDUSTRIES WE SERVE

As a manufacturer of engineered electrical solutions, we focus on delivering exceptional quality to our customers, through both our products and services.

Understanding Business

XACT Engineered Manufacturing Solutions are found in some of the most challenging environments and some of the most intricate installations across North America. We have a track record of successful collaborations with companies from diverse industries, working closely with them to address their specific challenges, meeting both project and business requirements. We look forward to working with companies from any sector.

Industry Focus

Much of our experience and expertise comes from working with companies related to:

- Energy, Defense and Hi-Tech

We also have an impressive and expanding list of customers in:

- Agriculture, Marine, Transportation and Logistics, Construction and Infrastructure

Building Relationships

Strong, collaborative relationships are critical to achieving success. Working closely with our customers, listening to their concerns and understanding their challenges, we have implemented an integrated team structure to deliver a superior customer experience. From technical sales and support to production and logistics, all hands are on deck to ensure that all requirements are met and expectations exceeded.

Energy

Our extensive knowledge and experience in the Energy sector have enabled us to develop highly-ruggedized products with a proven track record of excellent quality and reliability, even in the harshest environments. Additionally, our engineered solutions have played an integral role in some of the most intricate installations facilitating the speed and precision demanded by field operations.

Defense

Our expertise and capabilities in manufacturing engineered electrical solutions align well with the needs and requirements of defense and security environments. We understand and achieve not only the end product specifications, but we satisfy the stringent requirements for confidentiality and secure production integrating our solutions into various systems, networks and vehicles.

Hi-Tech

Our experience covers a depth and breadth of both rugged and intricate engineered electrical solutions. Whether it is collaborating on a solution for satellite communications, for medical imaging diagnostics, or an e-commerce system, we are confident in our capabilities and look forward to tackling the challenges faced by industry in this highly competitive, rapidly evolving arena.

Superior QUALITY:

Our product performance is second to none; 100% of our products undergo multi-stage quality testing.

Exceptional VALUE:

Our pricing is competitive; lean manufacturing practices and preferred vendor pricing allow us to pass savings on to our customers.

Rapid TURNAROUND:

Our agile processes allow us to deliver XACT products when our customers need them; expediting orders when necessary.

RFQ: CLIENT PORTAL

As a manufacturer of engineered electrical solutions, we focus on delivering exceptional quality to our customers, through both our products and services.

Excellence in Client Care

As our business has grown and evolved, so too has our approach to customer support. Working closely with our customers, listening to their concerns and understanding their challenges, we have implemented an integrated team structure to deliver superior customer care. From technical sales and support to production and logistics, all hands are on deck to ensure excellence in customer support.

Tools for Clients

Over the course of many years, we have consistently proven our capabilities in solving complex electrical interconnection problems; and while our business has grown and evolved, so too have our customer and technical support capabilities. XACT customers have access to project drawings through our customer portal, and soon, will be able to view the status of their orders and manage their account.

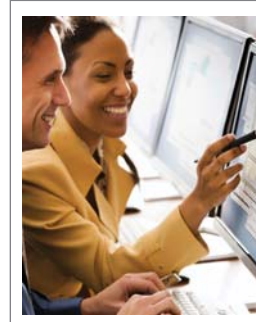

Improving Operational Efficiency

Time invested in proper planning and design translates to success in the field. While our teams work closely with customers to ensure specific project requirements are identified and needs are met, the XACT Client Portal facilitates operational efficiency for our clients - enabling them to access critical information anytime, anywhere; making important decisions without delay.

Security is a Priority

The security and confidentiality of XACT customer information is of paramount importance. As such, we have created a system where it is virtually impossible for customers to see other customer diagrams or information. The SSL certificate ensures that all communication between the customer and the system is encrypted and all customer information is protected.

A Library of Client Projects

We can provide you with industry standard cable assembly/interconnect drawings in 2D, 3D or to your specifications; production drawings can be made available within five working days. Once the drawings are approved for manufacturing, they will be accessible through the client portal. Each client will have a private, secure library of past and current drawings.

Sign-up Today

Our secure client portal is easy to engage and simple to use. The first step is to visit us at xact.ca/request-info and select Register for the Client Portal. From there, you will be contacted by an XACT customer service specialist. Accepting the terms and conditions of our End-user License Agreement helps to protect your information.
